# Introduction

**WP Tube Profit Wiz** is a plugin that can be used to add a YouTube Video which you can then use as monetizer.

You can insert a YouTube Video into any page or post and you can also add the custom content into the video. The content can be text, link, button, or popup optin form promos.

**Note:** The **Lite Version** of the plugin lacks the following features:

1. Restricted Video
2. Statistic
3. Optin Form

# Terms and Rights

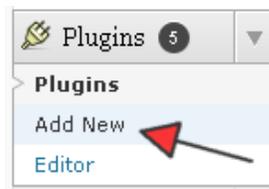

**Thank you for your purchase.**

**These are your rights to this package:**

- [ Yes ] For Personal Use Only.
- [ Yes ] May be used on as many WordPress blogs or websites as you own.
- [ No ] May not be used on client sites.
- [ No ] May not be used when blog or website flipping.
- [ No ] Resale Rights.
- [ No ] Master Resale Rights.
- [ No ] Private Label Rights.

## Installing

Download the zipped WP Tube Profit Wiz plugin to your computer. Log in to your WordPress site. Hover over the Plugins tab to expand, then click Add New.

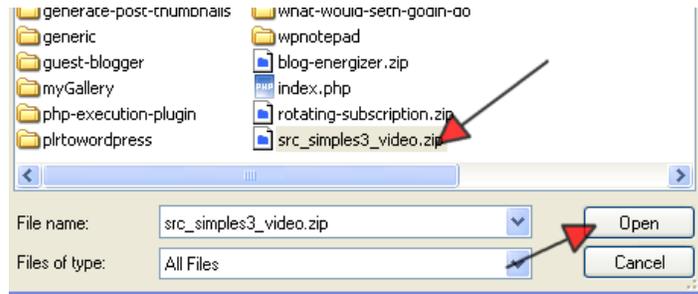

Select the Upload option

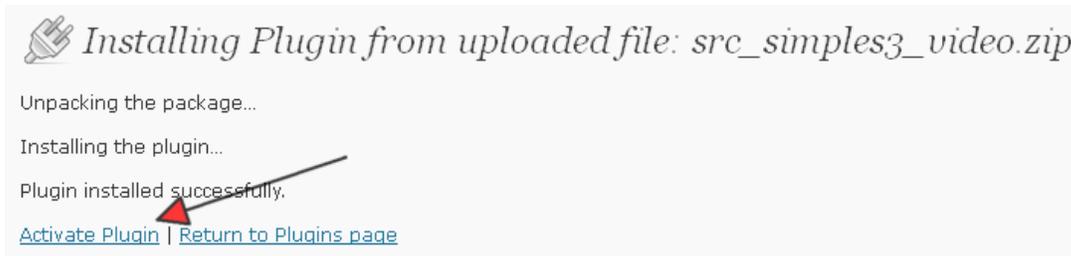

Click Browse

Locate the zipped WP Tube Profit Wiz plugin file, select it then click Open. (illustration shows a different plugin but process is the same)

Your plugin will now be uploaded and installed. Your next step after installation is to click the Activate Plugin link

## Alternative Setup - FTP

If installing from WordPress does not work for your blog, you may also do it the old fashioned way by first unzipping the WP Tube Profit Wiz plugin file to your computer. Open your FTP software and upload the entire "wp-tube-profit-wiz" or "wp-tube-profit-wiz-lite" folder to your WordPress plugin directory which will look like this file path inside your FTP software.

<http://www.yourblog.com/wp-content/plugins/>

Once upload has completed, log in to WordPress admin, navigate to Plugins. Locate WP Tube Profit Wiz and click Activate.

Simply upload the plugin zip using the WP admin panel browser uploader and activate.

## Upgrading

1. First BACK UP YOUR WORDPRESS DATABASE! We won't take any responsibility for your data, you have to look after it yourself.
2. Deactivate the existing version of the plugin.
3. Use your FTP client to delete the existing plugin.
4. Unzip the new version and save the extracted folder somewhere you can find it.
5. Use your FTP client to upload the newly extracted folder to your /wp-content/plugins/ directory on your WordPress blog or website OR use the new plugin uploader to install the upgrade.
6. Reactivate the plugin.

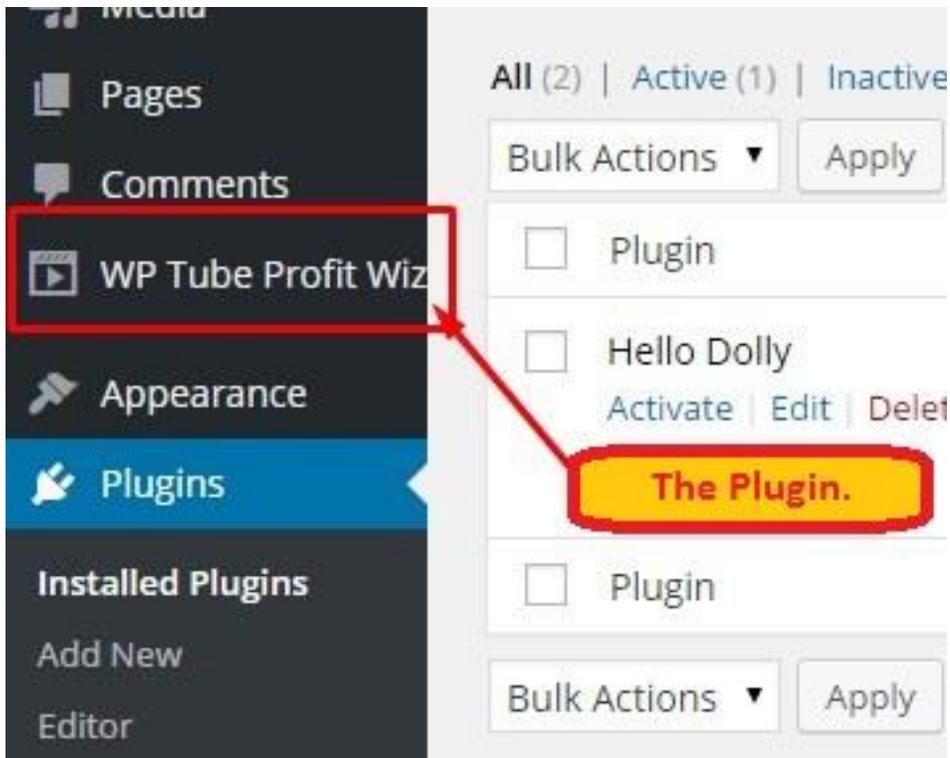

## Trouble Shooting

**If your blog or website displays with an error message when you activate the plugin or otherwise adversely affects your blog or website, then the first thing you should do is delete the plugin with your FTP client or using the delete function on the plugins page, and your blog or website will be restored to normal.**

## How to Use WP Tube Profit Wiz

This guide assumes that you have already logged in to your WordPress Admin Dashboard and that you have already installed and activated **WP Tube Profit Wiz**.

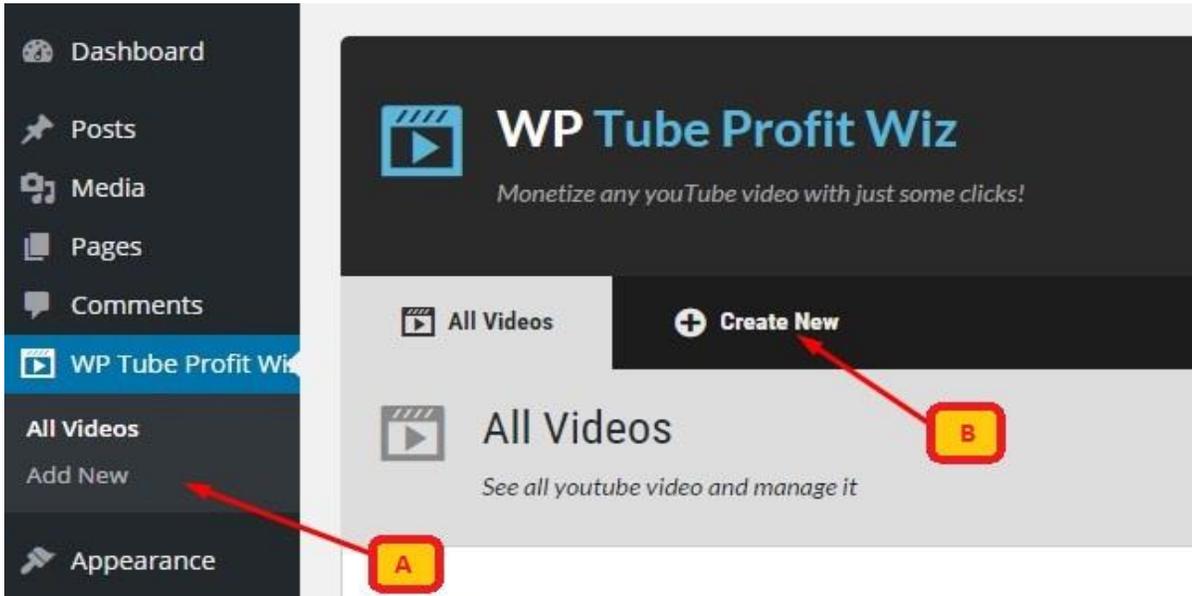

Once the plugin has been activated, you should see from the left admin panel its plugin option.

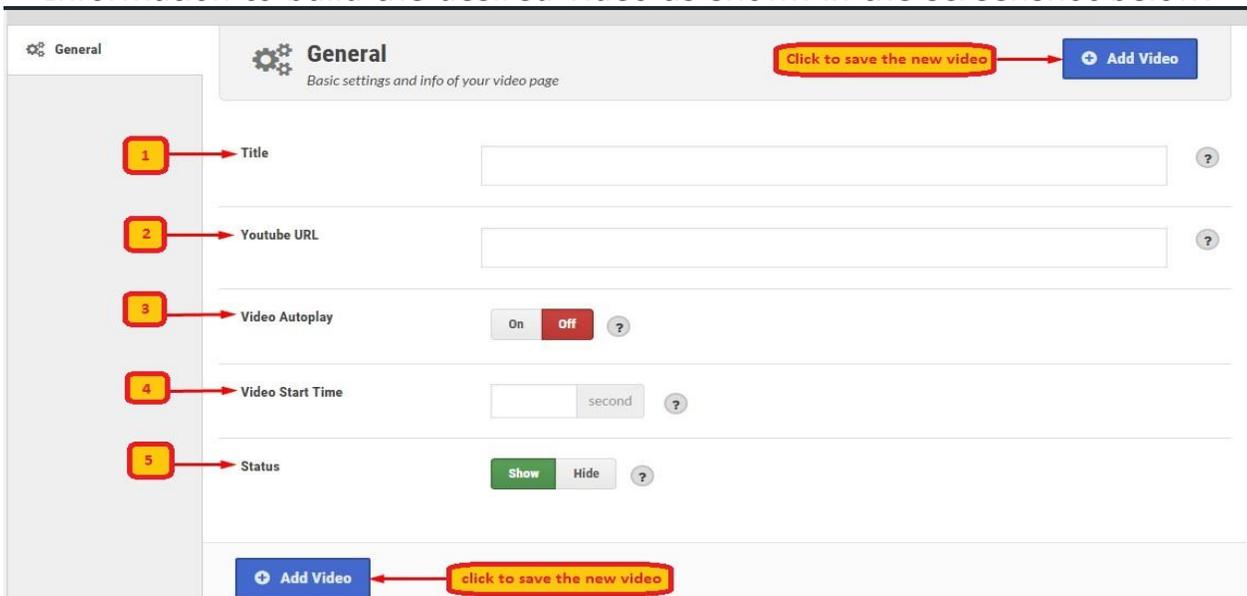

## How to Create a New Video

The following steps describe the process of creating a new Tube Profit Wiz Video.

1. Start by moving your cursor over to the menu item of the plugin in the left admin panel and click the **Add New** link. You can also click the "Create New" menu item, which you can find at the plugin's **Dashboard** as shown in the image below.

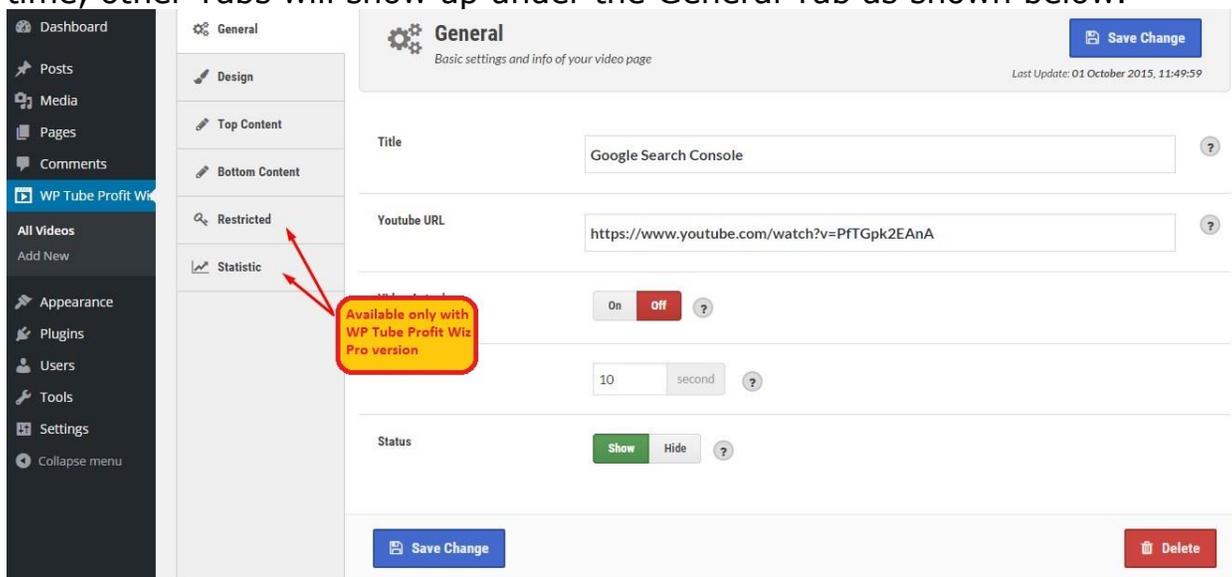

2. This should open up the **Create New** page where you will start adding the General Information to build the desired video as shown in the screenshot below.

- **Title.** Specify a unique name that will enable you to distinguish this video from the other videos that you create.
- **YouTube URL.** Specify the URL of the YouTube Video.
- **Video Autoplay.** Determines whether the video will automatically run when the page is loaded without having to click the play button.
- **Video Start Time.** Determines the the initial time (in seconds) that will serve as the starting point when the video is run.
- **Status.** Determines whether the video will be displayed in the page or not.

Once you are done filling up the above fields, click on one of the **Add Video Buttons** to proceed to the next steps.

Once you click the Add Video Button and the video is successfully saved for the first time, other Tabs will show up under the General Tab as shown below.

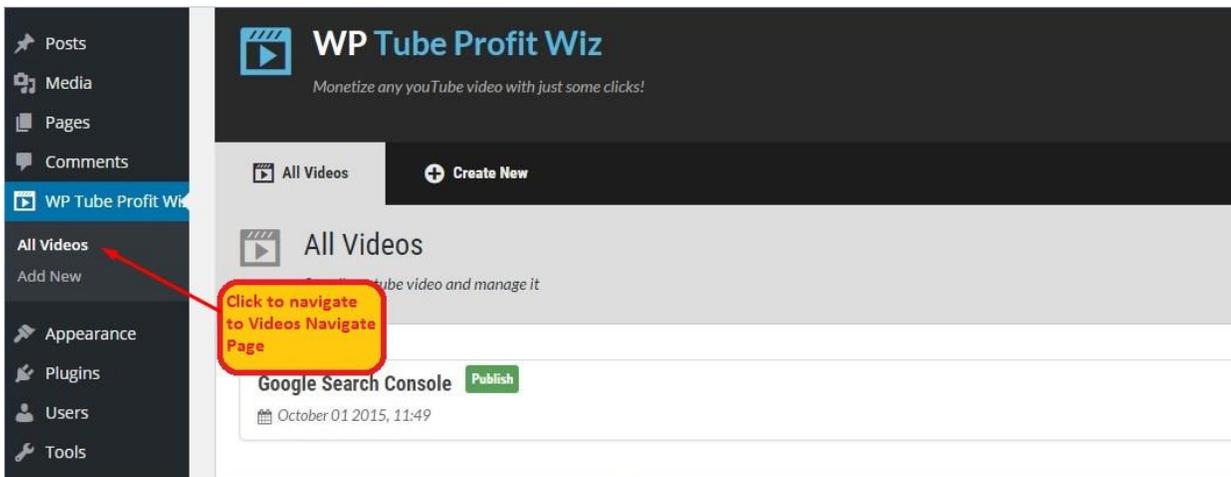

The guide on how to fill out the fields corresponding to each Tab (Design, Top Content, Bottom Content, Restricted and Statistic) will be discussed in a later section of this document.

But first, let's learn how to edit your newly created video.

## How to Edit a Video (General Tab)

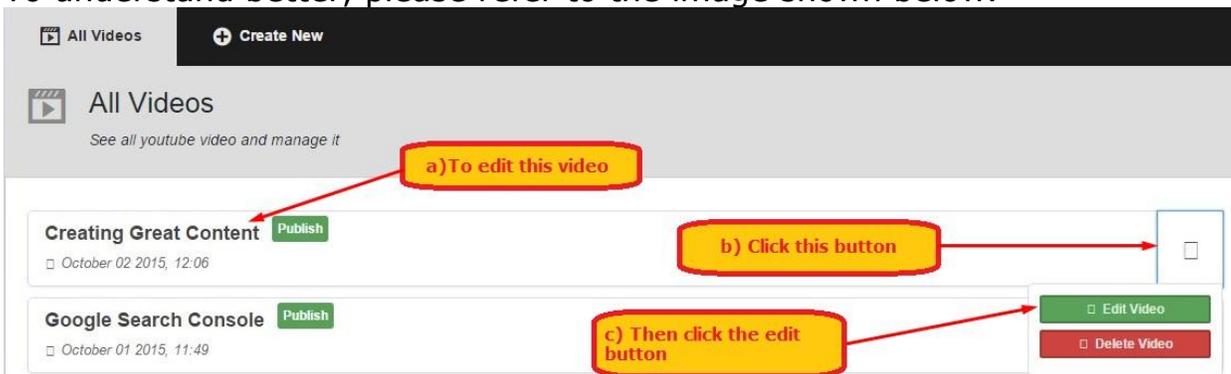

Editing **WP Tube Profit Wiz Video** involves just four easy steps.

1. Go to the Video List Page by clicking the All Videos Link under the WP Tube Profit Wiz link found in the sidebar as shown in the screenshot below.

2. From the list of videos displayed, click on the right-most button found in the same row as the video that you want to modify.

To understand better, please refer to the image shown below.

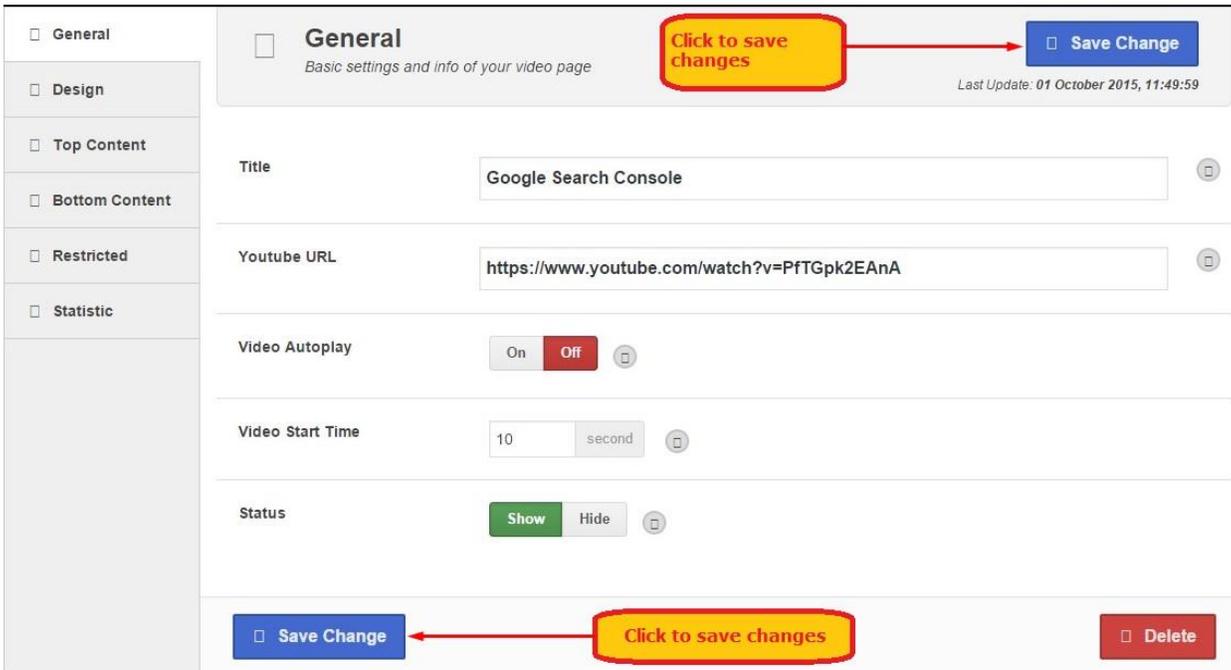

3. You will be taken to the Video Edit Page where the General Settings of the video is shown.

Make the necessary field entry changes that you want to apply on that particular Tab, or navigate to the other Tabs to modify the field settings corresponding to that group. The other Tabs will be discussed in the next section, but the process is similar.

4. Once you are satisfied with the settings, click on the **Save Changes Button** for the modifications to take effect.

Please refer to the screenshot below to see where the **Save Changes Button** is located.

# The Design Tab Settings

## The Design Tab Panel

The Design Tab Panel consists of two sections that function as follows:

- ❖ **Design Section** -- allows you to set the look and feel of the elements surrounding the video.
- ❖ **Popup Section** -- allows you to set the style of the Popup Window that shows up when you click a particular button that you set in the Top Content Box Tab and Bottom Content Box Tab, which will be discussed at the later parts of this document.

## The Design Section

The screenshot shows the 'Design' tab settings for a video player. On the left is a sidebar with navigation options: General, Design (selected), Top Content, Bottom Content, Restricted, and Statistic. The main panel is titled 'Design' with the subtitle 'Set look and feel of the Video'. A 'Save Change' button is in the top right, and a timestamp 'Last Update: 01 October 2015, 11:49:59' is below it. The settings are as follows:

- Video Width:** Input field with 'px' unit and a toggle.
- Video Height:** Input field with '300' and 'px' unit, and a toggle.
- Video Padding:** Input field with 'px' unit and a toggle.
- Background Color:** 'Select Color' button and a toggle.
- Background Image:** A 'No image' placeholder, a 'Select Photo' button, and a toggle. Text: 'Select an image or upload new image using the button below.'
- Background Repeat:** Dropdown menu set to 'Repeat All' and a toggle.
- Border:** Input field with '0' and 'px' unit, a 'Select Color' button, and a toggle.
- Border Radius:** Dropdown menu set to 'None' and a toggle.

**The Design Section** has the following settings that allow you to control the appearance of the video and its surrounding elements:

- Video Width – sets the width of the video in pixel units.
- Video Height – sets the height of the video in pixel units.
- Video Padding – sets the distance around the video in pixel units.
- Background Color – sets the background color of the area behind the video.
- Background Image – sets the background image that shows up behind the video.
- Background Repeat – sets how the background image (set above) is to be rendered.
- Border – sets the color and size of the border around the video.
- Border Radius – sets level of curvature of the border line.

## The Popup Section

Popup Design

---

Width  px

Background Color

---

Background Image   Select an image or upload new image using the button below.

---

Background Repeat

---

Border  px

---

Border Radius

**The Popup Section** has the following settings that allow you to control the appearance of the Popup Window.

- Width – sets the width of the popup box in pixel units.
- Height – sets the height of the popup box in pixel units.
- Font Family – sets the font-type for the text content in the popup box.
- Text Color – sets the color of the text content in the popup box.
- Background Color – sets the background color of the popup box.
- Background Image – sets the background image of the popup box.
- Background Repeat – sets how the background image appears in the popup box.
- Border – sets the border color and width of the border around the popup box.
- Border Radius – sets the level of curvature of the border around the popup box.
- Button Style – sets the style of the popup box button.
- Button Color – sets the background color of the popup box button.
- Button Size – sets the size of the popup box button.

## The Top (Bottom) Content Tab Settings

**Note:** The Top Content Tab and the Bottom Content Tab both share similar and common settings. This part of the document explains the settings that are applicable to both. The Top (Bottom) Content refers to the content box that appears at the top (bottom) of the video. You can control the general appearance of this content box by setting the appropriate options contained in the **Top (Bottom) Content Tab Settings** as shown below.

Show/Hide Top Content	<input checked="" type="checkbox"/> On <input type="checkbox"/> Off ?
Background Color	<input type="color" value="#000000"/> Select Color ?
Border	<input type="text" value="0"/> px <input type="color" value="#000000"/> Select Color ?
Auto Hide Content	<input type="checkbox"/> On <input checked="" type="checkbox"/> Off ?
Show/Hide Close Button	<input checked="" type="checkbox"/> On <input type="checkbox"/> Off ?
Title	
Show/Hide Title	<input type="checkbox"/> On <input checked="" type="checkbox"/> Off ?
Subtitle	
Show/Hide Subtitle	<input type="checkbox"/> On <input checked="" type="checkbox"/> Off ?
Info	
Show/Hide Info	<input type="checkbox"/> On <input checked="" type="checkbox"/> Off ?
Button	
Show/Hide Button	<input type="checkbox"/> On <input checked="" type="checkbox"/> Off ?

As you can see, the Top (Bottom) Content has five (5) sections, namely:

1. General – controls the overall appearance and style of the content box.
2. Title – controls the appearance of the Title text of the content box.
3. Subtitle – controls the appearance of the Subtitle text of the content box.
4. Info – controls the appearance of the text message that appears in the content box.
5. Button – controls the appearance of the button located at the bottom of the content box.

The Title, Subtitle, Info sections all share common settings and so they are explain as one here.

### **The Content Box General Settings**

- Show/Hide Top Content – determines whether the top content box is to be displayed or not.
- Background Color – sets the background color of the content box.
- Border – sets the color and size of the border around the content box.
- Auto Hide Content – determines whether the content box automatically hides or not when the mouse pointer is hovered on top of the video.
- Show/Hide Close Button – determines whether or not to display a close button at the top right portion of the content box.

### **The Title / Subtitle / Info Settings**

- Show/Hide Title/Subtitle/Info – sets whether or not the text for the title/subtitle/info.
- Title/Subtitle/Info – sets the text that appears as the title/subtitle/info of the content box.
- Font Size – sets the font size of the text.
- Font Family – sets the font style of text.
- Color – sets the color of the text.

## The Button Settings

- Show/Hide Button – determines whether to display or not the button at the bottom of the content box.
- Button Label – sets the text that appears as the label of the button.
- Button Style – sets the style of the button.
- Button Color – sets the color of the button.
- Button Size – sets the size of the button according to some pre- determined values.
- Font Family – sets the font type of the text that appears in the button.
- Action – sets the action that will happen when the user clicks on the button. Action can be set in any of three (3) options listed below.
  - ❖ Redirect to URL – simply redirects to the set URL page.
  - ❖ Display Opt-In Form – pops up a window showing an Opt-In Form.
  - ❖ Display Popup – displays a popup box whose settings were discussed above under the Design Tab Settings. (Please refer to pages 10 and 11 to review the settings.)

Each of these three settings is describe in more detail in the succeeding paragraphs immediately after this.

Action	Redirect to URL	?
URL	<input type="text"/>	?
<a href="#">Save Change</a>		<a href="#">Delete</a>

## Redirect to URL

This is the simplest option. Simple specify in the URL text box the URL of the page resource where you want to redirect the user when the button is clicked.

## Display Opt-In Form

Action

Display Optin Form

### Optin Form Settings

Form Title

Form Info

Form Code

Show/Hide Form Label

Show

Hide

Submit Button Text

When this is selected, then the user will be presented with an Opt-In Form whose fields and other details are set as follow. Form Title – specifies the title of the Opt-In form.

- Form Info – describes the Opt-In Form in detail.
- Form Code – this should contain the Raw HTML Code for the Opt-In Form of the client’s Autoresponder service.
- Action URL – specifies the URL of the Opt-In Form’s Action. Most of the time, this is automatically pre-populated after the Raw HTML Code is embedded in the Form Code above.
- Form Email Field – specifies the email field of the Opt-In Form. Most of the time, this fieldset is automatically pre-populated after the Raw HTML Code is embedded in the Form Code above.
- Form Name Field -- specifies the name field of the Opt-In Form. Most of the time, this fieldset is automatically pre-populated after the Raw HTML Code is embedded in the Form Code above. This fieldset can be set to display or not.
- Show/Hide Form Label – determines whether or not to display label of each form field. When set to hide, the label becomes a placeholder of the input field.
- Submit Button Text – sets the text or label of the Submit Button.

## Display Popup

When this action is selected, the user is then presented with a popup box that displays when the user clicks on the **Top/Bottom Content Button**. This popup box can be used to present product offerings or any message that you want to show to the visitor.

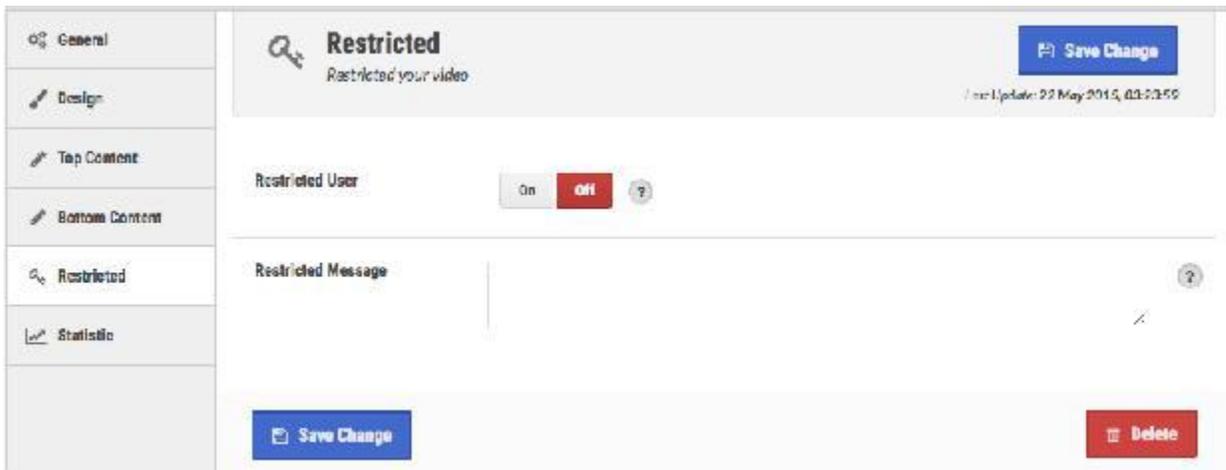

Popup Settings	
Title	<input type="text" value="My College Offer"/> ?
Image	 Select an image or upload new image using the button below. <input type="button" value="Select Photo"/> <input type="button" value="Clear Photo"/> ?
Image Link URL	<input type="text" value="http://www.example.com"/> ?
Info	<input type="text"/> ?
Button Label	<input type="text" value="Hey, I Want To Grab This"/> ?
Button URL	<input type="text" value="http://www.example.com"/> ?

Its setting

options are as follow.

- Title – specifies the title of the popup box.
- Image – specifies the image that will be shown in the popup box.
- Image Link URL – specifies the URL to which the user will be redirected when he clicks the Image.
- Info – specifies the text content of the popup box.
- Button Label – specifies button label that appears below the popup box.
- Button URL – specifies the URL to which the user will be redirected when the popup box button is clicked.

## The Restricted Tab Settings

The **WP Tube Profit Wiz** Plugin can be set so that only authenticated users are able to see the video and this is made possible with the settings available in this section.

- Restricted User – determines whether the video is available only to authenticated users or the public as well.
- Restricted Message – sets the message to be displayed to users who are not allowed to view the video.

## The Statistic Tab

This section can be used to view statistical information that result from the user's interaction with the video objects that were embedded into the page or post.

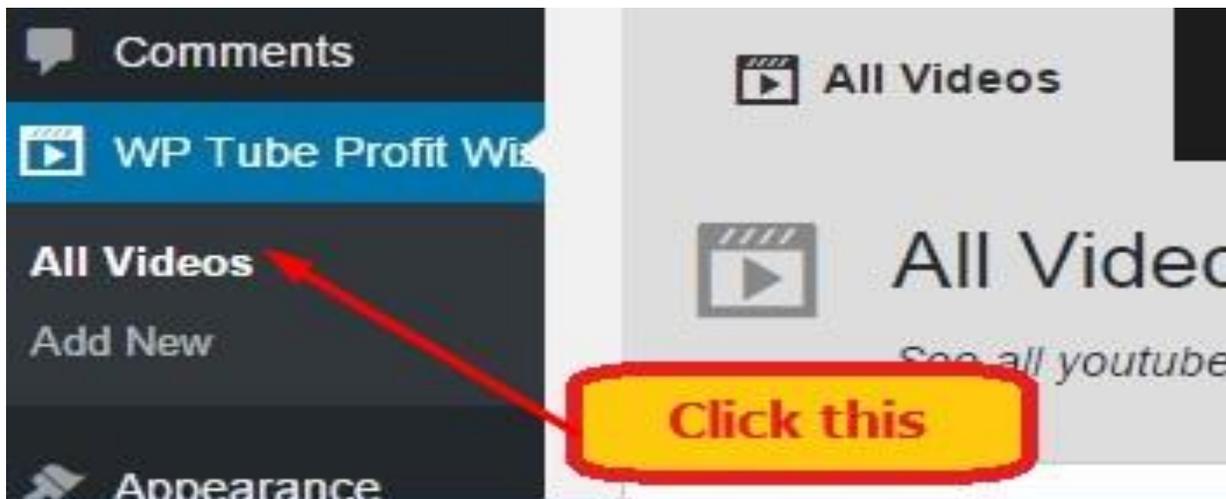

The following statistics are available:

- Views – shows the number of users who have seen the video.
- Subscribe – shows the number of users who have been using the Opt- In Form.
- Popup Button Clicks – shows the number of users who have clicked the button / link in the popup box.
- Button Clicks – shows the number of users who have clicked the button / link redirect.

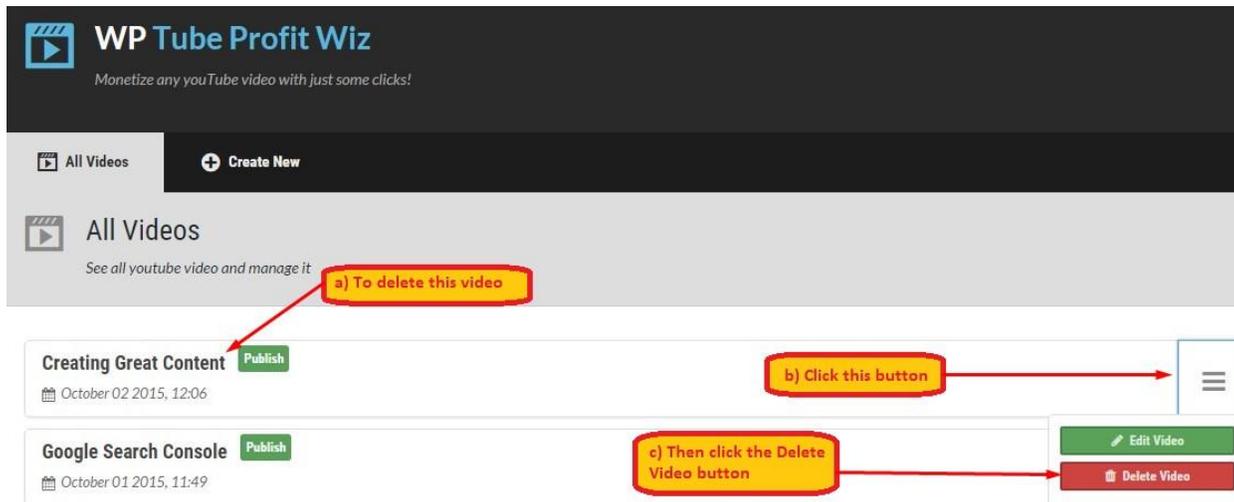

## How to Delete a Video

Deleting a video involves three steps.

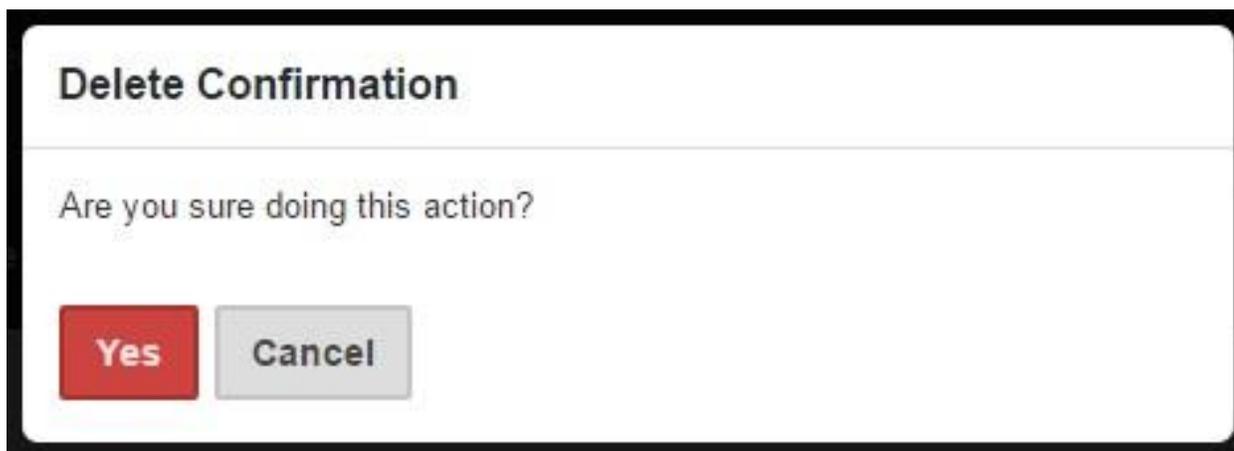

1. Click on the **All Videos Link** from the WP Tube Profit Wiz located at the Sidebar of the WordPress Admin Dashboard.

2. From the list of videos presented, navigate until you see the video that you want to delete. Click on the right-most button along the same row as the video, then click the **Delete Video Button** that shows up as colored red.

3. A Popup Window will appear prompting you to proceed or cancel the video deletion process. Click the Yes Button to proceed and so delete the video. Or, click the Cancel Button to abort the process.

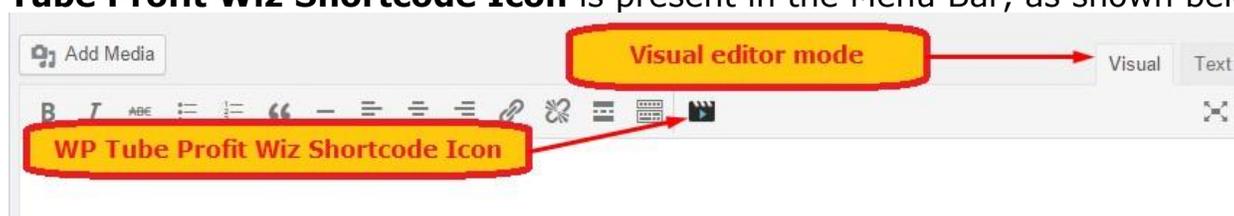

## How to Embed a Video into a Page or Post

Embedding a Video into the any post or page is very easy. Please follow the steps outlined below.

1. Make sure that your user profile allows you to write a page or post in Visual Mode as opposed to the Text Mode. You can check this by viewing your Use Profile Page and unchecking the Visual Editor Box as shown in the screenshot below.

2. Create or Edit the Page or Post where you want to embed a video from the default **WordPress Editor**. Make sure that you are in Visual Editor Mode and check if the **WP Tube Profit Wiz Shortcode Icon** is present in the Menu Bar, as shown below.

3. Position the cursor where you want the video to appear in the post/page, and then click on the WP Tube Profit Wiz Shortcode Icon.

4. A Popup Window then appears that allows you to select the video that you want to embed in the page as shown below.

## How to Embed a Video into a Page or Post (continued)

Insert Video x

Select Video  ▼ **a) Select a video from the drop down**

**Insert Video** **b) Click this to generate the shortcode.**

5. Click on the Insert Video to generate the WP Tube Profit Wiz Shortcode and embed it directly in the post/page at the position of the cursor as shown below.

This is an example page. It's different from a blog post because it will stay in one place and will show up in your site navigation (in most themes). Most people start with an About page that introduces them to potential site visitors. It might say something like this:

[wp\_tube\_profit\_wiz video="5"][/wp\_tube\_profit\_wiz]

**The actual WP Tube Maximize Shortcode**

Hi there! I'm a bike messenger by day, aspiring to be a full-time bike messenger by night. I live in Los Angeles, have a great dog named Papi, and I love piña coladas. (And gettin' caught in the rain.)

6. Don't forget to save the post or page for the changes to take effect.

# Resources

*Chris Jenkins*

*Monika Morley*

Known by some as The IM Helper, Chris has over 5 years of online experience, initially specializing in Internet Marketing. Chris, among other things, has a good deal of experience with SEO. To give you a taste of his abilities, Chris takes a mere 2.5 minutes, to get any website on Google Page Rank 1, unbelievable, but true.

Products like Chris' Massive Traffic Profit System, WSO Quick Funnels, List Building Super Nova, are just a few examples of his product ideas. While some products, like RSS Link Wheel Sage, PingFM Poster, Stealth Backlink Sniper, Redirect Buddy, Optin-Wiz, and many others are products that Chris helped develop with partners. Chris is always open to new ideas from potential partners on products.

CJ Success Team LLC, Chris' company, has been and remains, an eBay PowerSeller, often with his wife Camille at the helm of these endeavors. Chris' wife and family are all integral parts of his company and his Internet businesses.

Most recently, Chris has been launching WSOs (Warrior Special Offers) on the Warrior Forum. Chris also participates in a great many smaller projects, such as enormous Giveaway and Mini-Giveaway events, where he consistently dominates the leader boards. Quoted from a private source, Chris managed to add 40,000 subscribers in only 7 months.

Monika has been running her own Online Business since 2010 and specializes in List Building, Email Marketing, Product Creation and JV Management. Her key factors to success include establishing Joint Venture Partnerships with Top Marketers and Product Creators, like Chris Jenkins, Chad Nicely, and Rob Maggs (to name a few) and plays a leading role in implementing successful Product Launches.

Monika's personal strategy ensures customers get Top Class Information Products and Tools. She Researches, Analyzes, Tests, Communicates, Creates, Connects and provides Support. This develops long lasting relationships with marketers at all levels and provides clients with up to date information, strategies, and tools that are proven to work in various niches. Helping Partners, Affiliates and Customers succeed is Monika's main goal.
