# **Introduction**

## **WP Video Page Generator**

WP Video Page Generator is a wordpress plugin that, as the name suggests, allows you to create a page where you can list down your video(s) for whatever purpose it may serve best. It offers flexible customization options for styling and other functionality as well as a built-in statistics function to check the performance of each video page.

Note: This plugin has a lite version that is missing the following options: Restricted user, Top Style, Footer Style, Box Style, Menu Style, Menu Color, Social Icon Style, Open Graph Image URL, Favicon URL, Tracking Code and Script.

# Terms and Rights

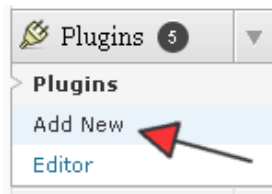

**Thank you for your purchase.**

**These are your rights to this package:**

- [ Yes ] For Personal/Developer Use Only.
- [ Yes ] May be used on as many WordPress blogs or websites as you own.
- [ Yes ] May be used on client sites.
- [ Yes ] May be used when blog or website flipping.
- [ Yes ] May be given away for list building / optin purposes only.
- [ No ] Resale Rights.
- [ No ] Master Resale Rights.
- [ No ] Private Label Rights.

## Installing

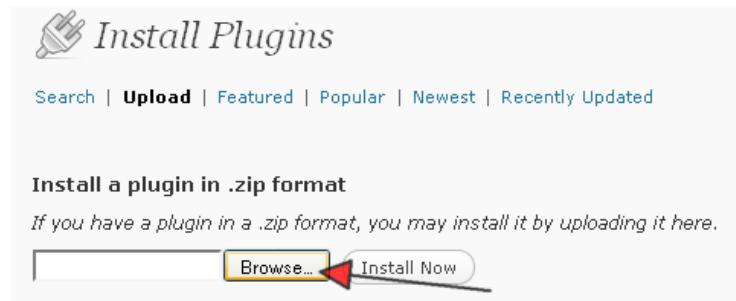

Download the zipped WP Video Page Generator plugin to your computer. Log in to your WordPress site. Hover over the Plugins tab to expand, then click Add New.

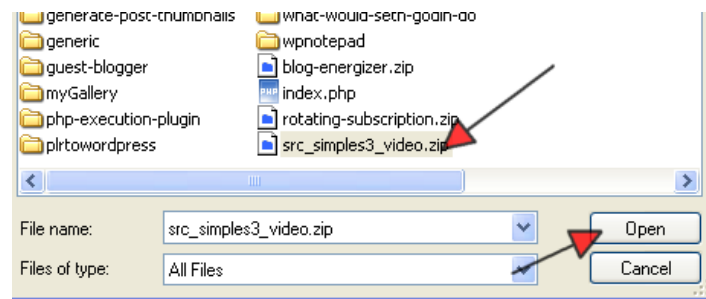

Select the Upload option

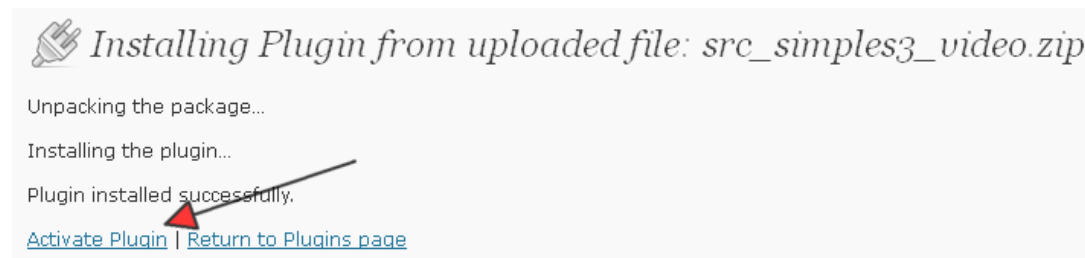

Click Browse

Locate the zipped WP Video Page Generator plugin file, select it then click Open. (Illustration shows a different plugin but process is the same)

Your plugin will now be uploaded and installed. Your next step after installation is to click the Activate Plugin link

## **Alternative Setup - FTP**

If installing from WordPress does not work for your blog, you may also do it the old fashioned way by first unzipping the WP Video Page Generator plugin file to your computer. Open your FTP software and upload the entire “wp-video-page-generator” or “wp-video-page-generator-lite” folder to your WordPress plugin directory which will look like this file path inside your FTP software.

<http://www.yourblog.com/wp-content/plugins/>

Once upload has completed, log in to WordPress admin, navigate to Plugins. Locate WP Video Page Generator and click Activate.

Simply upload the plugin zip using the WP admin panel browser uploader and activate.

## **Upgrading**

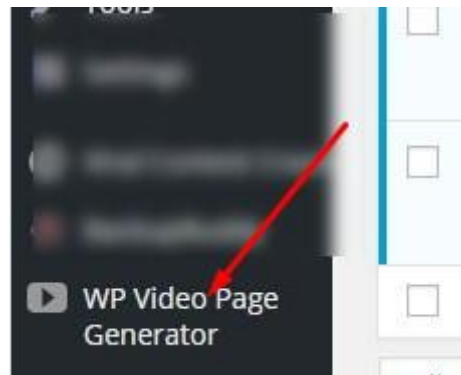

1. First BACK UP YOUR WORDPRESS DATABASE! We won't take any responsibility for your data, you have to look after it yourself.
2. Deactivate the existing version of the plugin.
3. Use your FTP client to delete the existing plugin.
4. Unzip the new version and save the extracted folder somewhere you can find it.
5. Use your FTP client to upload the newly extracted folder to your /wp-content/plugins/ directory on your WordPress blog or website OR use the new plugin uploader to install the upgrade.
6. Reactivate the plugin.

## **Trouble Shooting**

If your blog or website displays with an error message when you activate the plugin or otherwise adversely affects your blog or website, then the first thing you should do is delete the plugin with your FTP client or using the delete function on the plugins page, and your blog or website will be restored to normal.

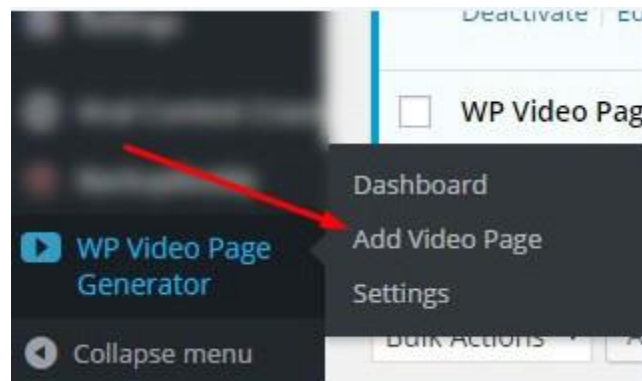

## How to Use WP Video Page Generator

This guide assumes that you have already logged in to your wordpress admin area, installed and activated WP Video Page Generator. Once the plugin has been activated, you should see from the left admin panel its plugin option.

## How to Add a Video Page

1. To add a new video page, start by moving your cursor over the plugin's menu item from the left admin panel then click Add Video Page thereafter.

2. You should now inside the Add Video Page page that looks exactly the same as the image below. You would need to configure the settings and supply the required fields with the appropriate information to add

and save the video page. Listed below the image are descriptions for each available field in this page.

The screenshot shows the 'Add Video Page' interface of the WP Video Page Generator plugin. At the top, there is a navigation bar with 'Dashboard', 'Add Video Page', and 'Settings' tabs. Below this is a header section with the plugin logo and name. The main content area is titled 'Add Video Page' and contains a 'General' settings panel. This panel includes fields for 'Page Name', 'Permalink' (with a preview), 'Status' (with 'Publish' and 'Draft' buttons), 'Restricted User' (with 'On' and 'Off' buttons), and 'Videos Per Page' (with a value of 20 and a note to set to 0 for all videos). A blue 'Add Video Page' button is located at the bottom right of the form.

- Page Name. This field should be supplied with a unique name that would make it easy identifying it from the rest of the video pages.
- Permalink. The permalink field is intended for the structure of your video page's link. You may leave the field empty as the system will automatically generate the link structure for you. However, if you would like to edit it, you need to remember that only - and \_ symbols are only allowed.

- Status. Select whether you would like to take the video page live by clicking Publish or keep it in Draft should you wish to edit it on a later date.
  - Restricted User. The switch determines whether this video should be exclusively available for logged in users. Note that this option is not available in the lite version of the plugin.
  - Video Per Page. This field should be supplied with a numerical value as this determines how many videos to be displayed on the video page.
3. After reviewing and finalizing the settings and details of the video page, click Add Video Page button to save the video page so you can customize it further.
  4. After you have successfully added the video page, you will be redirected to the video page's edit page. It is in this page where you can customize the style and layout of the video page, add and manage the videos to be displayed on the video page as well as access the statistic to check the page's performance.

- **Top Style.** This section contains options to customize the style of the video page's header. Note that this section is not available in the lite version of the plugin.
  - **Header Style.** Choose from the 3 predefined header styles from the dropdown you would like to be applied on the header of the video page.
  - **Text Color.** Make use of the built-in color picker to select the color you would like the text contents in the header to be displayed in.
  - **Background Color.** Use the built-in color picker to choose the background color to apply to the header section of the video page.
  - **Menu Style.** Choose from the predefined menu styles listed in the dropdown which one you would like to implement on the header section's menu if applicable.
  - **Menu Color.** From the dropdown, select the color that would define the color of the texts on the menu.
  - **Font Family.** This field determines the font family to be used on the text contents of the header section.
- **Top Content Style.** This section contains styling options for the top content of the video page.
  - **Text Color.** Use the built-in color picker to choose the color to display the text contents of the top content.
  - **Background Color.** Use the built-in color picker to define the background color of the top content section.
  - **Font Family.** Select from the list of fonts you would like to use and apply to the text contents of the top content section of the video page.
- **Footer Style.** This section allows you to customize the style of the footer area of the video page.

- Footer Style. Choose from the 3 predefined footer styles you would like to apply to your video page's footer. Note that this option is not available in the lite version of the plugin.
  - Text Color. Using the built-in color picker, choose the color you would like to display all the text contents in the footer area.
  - Background Color. Define the color you would like to implement as the background color of the footer section using the system's built-in color picker.
  - Menu Style. If you have enabled footer menu display on the video page, choose from the predefined styles available on the dropdown you would like to apply to the footer menu. Note that this option is not available in the lite version of the plugin.
  - Menu Color. Select from the dropdown the color of the texts you would like the menu items to be displayed. Note that this option is not available in the lite version of the plugin.
  - Font Family. From the dropdown, select the font you would like to use and apply to the text contents of the video page's footer.
- Main Section Style. This section enables you to customize the style of the video page's main section.
    - Background Color. Use the built-in color picker to choose a color to apply as the background color of the video page's main section.
    - Text Color. Choose the default color to be applied on the video page's text contents using the built-in color picker.
    - Font Family. Select from the dropdown the default font to use on the video page.
  - Box Video Settings. This section contains styling options to customize the look of the boxes that encloses each videos in the video page. Note that this section is not available in the lite version of the plugin.
    - Style. From the dropdown, choose from the 6 predefined styles which one you would like to use on video boxes.
    - Background Color. Using the built-in color picker, select the background color to be applied to each video box.
    - Text Color. Use the built-in color picker to select the color to apply to the text contents in the video box.

- **Border.** This option allows you to further improve the look of the video boxes by applying a border around it. Turn the switch On to use the border option then set how wide in pixels will the border be, the style (whether solid, dashed or dotted) and the color of the border using the built-in color picker.
- **Box Shadow.** Select from the dropdown which style of box shadow you want to apply to the video boxes or apply no box shadow at all.
- **Box Transparency.** From the dropdown, choose how transparent you would like your video boxes to be displayed.
- **Share.** This tab contains options that would allow you to add social sharing icons to every video box so your visitors can easily share your video page to their social media sharing accounts and attract more visitors to your page.

The screenshot shows the 'Share Settings' tab in a video player's configuration menu. On the left is a sidebar with various settings categories: General, Offers, Header and Footer, Top Content, Design, Share (selected), SEO, Script, and Statistic. The main area is titled 'Share Settings' with a subtitle 'Setting for share button in profit page' and a 'Save Change' button. Below this, there are three main sections: 'Show Share Button' with a toggle switch set to 'On'; 'Button Activate' with a text prompt and four social media buttons (Facebook, Twitter, Google+, Pinterest); and 'Button Icon' with a dropdown menu set to 'Square Flat' and a preview of the four social media icons. At the bottom, there are 'Save Change' and 'View Page' buttons. A timestamp 'Last Update: 17 November 2014, 01:44:28' is visible in the top right corner of the settings area.

- **Show Share Button.** This switch controls whether you would like to enable the display of the social sharing buttons to your box offers by turning it on or turn it off to disable it.

- **Button Activate.** Choose from the 4 most popular social sharing sites you would like to be available on every video. Click the icon of the social sharing site to activate or deactivate its usage. By default all 4 are activated as indicated by the full colors of every icon. Deactivated social sharing site will have the icon displayed in grayscale.
- **Button Icon.** From the dropdown, select the style of the social sharing buttons you would like to use as it gets displayed on every video box. Note that this option is not available in the lite version of the plugin.
- **Preview.** Displays a preview or a sample of how the selected style of the button icon looks like.
- **SEO.** This section allows you to add meta data in order to make your video page SEO friendly.
