# Terms and Rights

**Thank you for your purchase.**

**These are your rights to this package.**

- [ Yes ] For Personal Use Only.
- [ Yes ] May be used on as many WordPress blogs or websites as you own.
- [ No ] May not be used on client sites.
- [ No ] May not be used when blog or website flipping.
- [ No ] Resale Rights.
- [ No ] Master Resale Rights.
- [ No ] Private Label Rights.

## Introduction

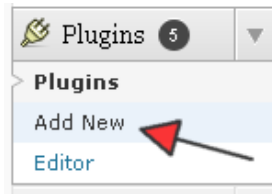

### What You Get

The WP Spam Renegade plugin enables you to use those naughty incoming spam comments for your own purposes. Instead of cursing the spammers you can just laugh at them instead as they add comment after comment with links pointing to your sites instead of theirs.

It does this by automatically replacing their links with yours for ALL incoming comments until you accept the URLs in their comments. You can even remove the URL from their ID by clicking the small x next to it.

# Installing

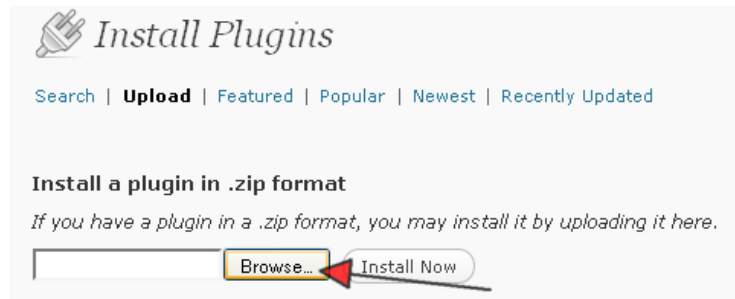

Download the zipped WP Spam Renegade plugin to your computer. Log in to your WordPress site. Hover over the Plugins tab to expand, then click Add New.

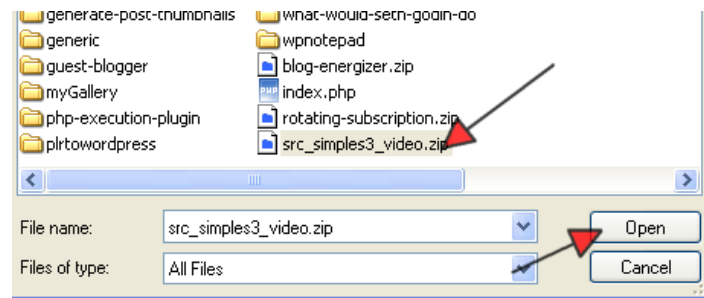

Select the Upload option

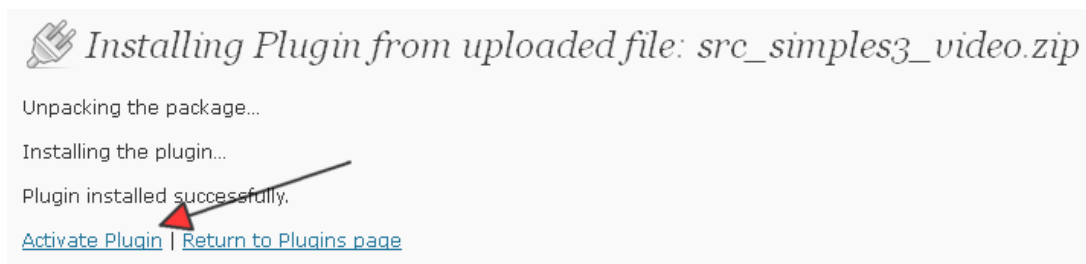

Click Browse

Locate the zipped WP Spam Renegade plugin file, select it then click Open.  
(illustration shows a different plugin but process is the same)

Your plugin will now be uploaded and installed. Your next step after installation is to click the Activate Plugin link

### Alternative Setup - FTP

If installing from WordPress does not work for your blog, you may also do it the old fashioned way by first unzipping the WP Spam Renegade plugin file to your computer. Open your FTP software and upload the entire “wp-spam-renegade” folder to your WordPress plugin directory which will look like this file path inside your FTP software.

<http://www.yourblog.com/wp-content/plugins/>

Once upload has completed, log in to WordPress admin, navigate to Plugins. Locate WP Spam Renegade and click Activate.

Simply upload the plugin zip using the WP admin panel browser uploader and activate.

### Upgrading

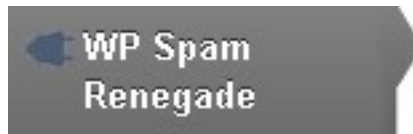

1. First BACK UP YOUR WORDPRESS DATABASE! We won't take any responsibility for your data, you have to look after it yourself.
2. Deactivate the existing version of the plugin.
3. Use your FTP client to delete the existing plugin.
4. Unzip the new version and save the extracted folder somewhere you can find it.
5. Use your FTP client to upload the newly extracted folder to your /wp-content/plugins/ directory on your WordPress blog or website OR use the new plugin uploader to install the upgrade.
6. Reactivate the plugin.

### Trouble Shooting

If your blog or website displays with an error message when you activate the plugin or otherwise adversely affects your blog or website, then the first thing you should do is delete the plugin with your FTP client or using the delete function on the plugins page, and your blog or website will be restored to normal.

# Usage

After installation and activation you'll see a new menu in your admin bar.

Clicking on the "WP Spam Renegade" link will take you to settings page where you can configure the plugin.

## Settings

**Always remove urls on comments**  *in days* OPTIONALLY remove all URLs when made on older posts.

**Replace Links**  
  
  
 Add your list of links to replace comment URLs.

*enter replacements one each line*

**Replace Spammy Words**  
  
  
  
 Replace spammy text with your own by entering the spam a ~ and then your own text.

*spammy word/phrase ~ replacement*

**Do not apply to comments from Admin**  
☒

**Save Changes**

You can optionally enter a number of days to remove all URLs on older posts. Leaving comments on older posts is typical of automated spam tools.

To replace incoming spam links with your own, just enter yours one per line and as the spammy links come in they will be replaced with your own. Of course these can also include your own affiliate links.

You can also replace spammy words and phrases by adding them one per line and also specifying your own replacement word or phrase. You do this by adding the word or phrase you want replacing (e.g. forex), a tilde character (~) and the word or phrase you want to use instead.

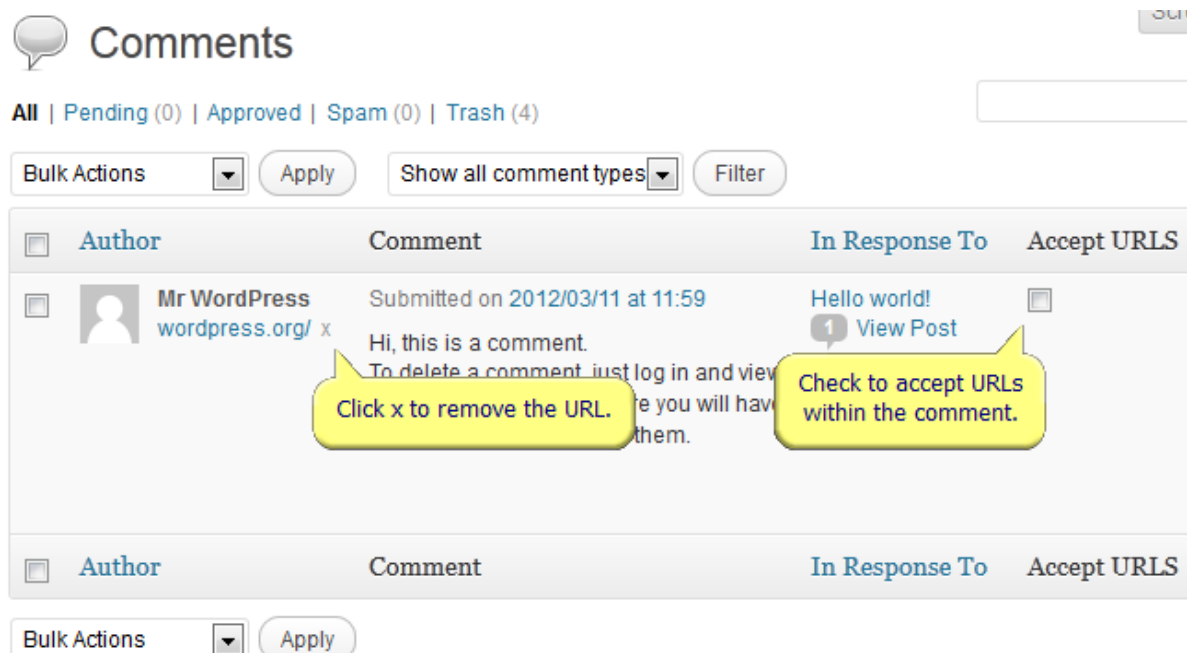

Example:-

forex~internet business  
viagra~puppy dogs  
make money~drink beer

Finally you can opt not to apply any of these settings to comments made using the admin account.

## Approving and Tweaking Comments

On the “Comments” admin page you’ll see a couple of useful tweaks you can make. Next to each author URL, there is a new x which you can click to remove the link permanently. There is also a new column called “Accept URLs” – simply check this and all the URLs and keywords will revert to the originals. Very useful for marking genuine comments from non-spammers.

**Comments**

All | Pending (0) | Approved | Spam (0) | Trash (4)

Bulk Actions  Show all comment types

<input type="checkbox"/>	Author	Comment	In Response To	Accept URLs
<input type="checkbox"/>	 <b>Mr WordPress</b> wordpress.org/ x	Submitted on 2012/03/11 at 11:59 Hi, this is a comment. To delete a comment, just log in and view them. Click x to remove the URL.	Hello world! 1 View Post	<input type="checkbox"/>

Bulk Actions

# Conclusion

## **Imagine Turning A Nuisance Into Something Worthwhile?**

I know you hate spam as much as I do, but now you can get even with the spammers by taking advantage of their garbage and turning their spam links to good use in order to capitalize on a very annoying problem. From trash to treasure!

## **You Can Use The WP Spam Renegade Plugin To...**

Learn how the “WP Spam Renegade” plugin enables you to use those naughty incoming spam comments for your own purposes. Instead of cursing the spammers you can just laugh at them instead as they add comment after comment with links pointing to your sites instead of theirs.

## **Ease Of Use And Easy To Maintain.**

WP Spam Renegade does this by automatically replacing spammer's links with yours, for ALL incoming comments, unless you accept the URLs in their comments. You can even remove the URL from the spammer's ID link by clicking the small “x” next to it.

We know you will thoroughly enjoy this wonderful plugin. Let it help you eliminate harmful spam from your websites, and turn it into something that will make your business grow more and more!

To your success,

*Chris Jenkins*
